

CostWORX is the leading wholesale distributor of telecom & technology infrastructure products, supplying globally through a network of local alliance partners.

## 40m 4-Leg Tower - 15m<sup>2</sup> Loading

Optimised for cellular telecom applications, this structure is produced with deployment and operation in mind and is capable of supporting 15m<sup>2</sup> of antenna load whilst remaining within a deflection limit of 0.5° at operational wind speed.

Produced from premium steel members hot dip galvanised equivalent to ASTM A123 (2000) and connected with high grade galvanised bolts, this structure has a design life in excess of 25 years.

Export packed and supplied with holding down bolts, anchor plates and setting template, this product is the quality choice.

| Loading     | Height       | Туре                  | Area                   |
|-------------|--------------|-----------------------|------------------------|
| Distributed | Over Top 10m | Antenna Loading       | 15m²                   |
| Linear      | Vertical Run | Feeder Cable & Ladder | 0.50 m <sup>2</sup> /m |

| Design Wind Speeds (3 Second Gust) |          |  |  |  |
|------------------------------------|----------|--|--|--|
| Basic Wind Speed                   | 44.0 m/s |  |  |  |
| Operational Wind Speed             | 44.0 m/s |  |  |  |

| Deflection            |                                  |
|-----------------------|----------------------------------|
| Less than or Equal to | 0.5° (at Operational Wind Speed) |

| Design Parameter     |   |  |
|----------------------|---|--|
| Structure Class      | 2 |  |
| Exposure Category    | С |  |
| Гороgraphic Category | 1 |  |

## **Design Standards**

| Material         | Standard     | Steel Grade | Tensile Strength      | Yield Strength |
|------------------|--------------|-------------|-----------------------|----------------|
| Structural Steel | GB 700-88    | Q235        | 375-500 N/mm²         | 235 N/mm²      |
|                  | GB/T 1591-94 | Q345        | 470-630 N/mm²         | 345 N/mm²      |
| Structural Bolts | BS 3692      | 8.8         | 830 N/mm <sup>2</sup> | 664 N/mm²      |

CostWORX is the leading wholesale distributor of telecom & technology infrastructure products, supplying globally through a network of local alliance partners.

## **Codes of Practice**

ANSI/TIA 222-G: 2005 - Structural Standard for Steel Antenna Tower and Antenna Support Structures

ANSI/AISC 360-05 : 2005 - Specification for Structural Stell Buildings

Galvanization Equivalent to ASTM A123 (2000)

## **Features**

- Internal Caged Ladder

- Work Platform 17.6m / 35.0m

- Rest Platform N/A

- Holding Down Bolt Kit

- Setting Template

- Lightning Spike
